

## Why choose Southern Stone?

1. Largest inventory in South Texas. We recently doubled our property, now we have 2 acres of stone! We guarantee nobody can beat that selection!!
2. Excellent Customer Service.
  - a. Your stone order can usually be delivered that same day.
  - b. Even special or large orders delivered in about a week, in most cases at the jobsite in a few days!
  - c. We'll take care of your customers for you! Just send your customers in and we'll happily educate them about stone, and assist them in making their stone selection.
3. We have lots of pictures of stone homes and other projects to help us explain to you not only your selection of stone but also the different options when it comes to installing it.
4. We specialize in stone only. This makes us more knowledgeable and more educated in our stone products.
5. We would be happy to discuss and measure your plans with you to help ensure you are delivered the correct amount of stone.
6. Our stone is weighed on a digital scale, because nobody knows quantity just by sight. For example, if your current vendor says all pallets are 2 tons, that is incorrect.
7. Delivery charge is \$35 or less from Mission to Harlingen (deliveries available anywhere in Texas). Ask about FREE delivery.
8. Southern Stone can serve both wholesale and retail needs. No sale is too big or too small.
9. Our website serves as a portable brochure that has the most current information and pictures of stone. If you see something you like, give us a call to discuss it in more detail.
10. We are exclusive distributors of Coronado Stone®. "The leader in manufactured stone, brick, and tile products."
11. We are also distributors of Pavestone®. Products include interlocking pavers, segmental retaining walls, patio & landscape products, and lawn & garden edging products.
12. Stop by and see our displays of natural stone, Coronado Stone®, and Pavestone® for ideas, free samples, and installation techniques.
13. Southern Stone is a proud member of the Better Business Bureau, National Federation of Independent Business (NFIB), American General Contractors and is HUB certified.
